

Putting school at the centre of community

# Developing leaders who can build our nation

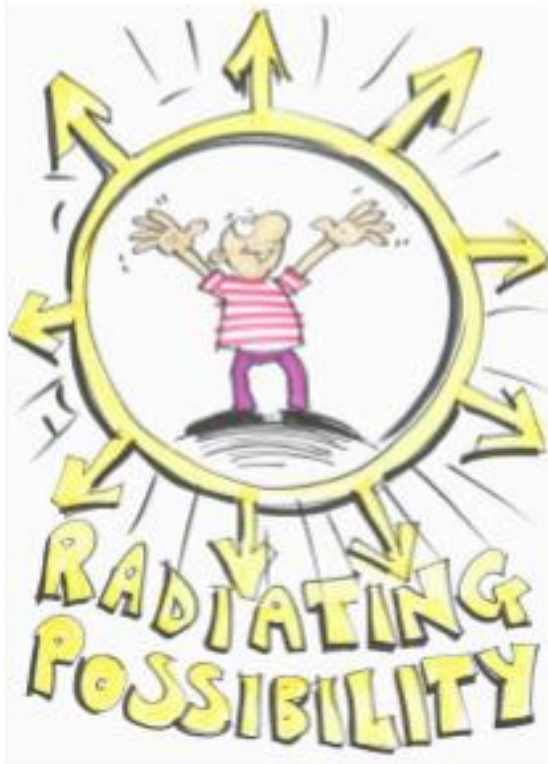

SYMPHONIA  
for South Africa

What culture is needed for education to thrive in a fast-changing world?

# Strong connections between all role-players for a cohesive team

Resourcefulness,  
rather than  
resources

\* BEING A CONTRIBUTION!

- Communication, communication, communication
- Relationships, relationships, relationships
- Have a vision and communicate that regularly
  - What are the fundamental beliefs that you want your team to hold about the work they do?
  - What do you want your team to value as being right, good, and just about the work they do?
  - What expectation should everyone have about the appropriate or desirable way of operating?
  - What actions and attitudes do you expect to consistently observe?
- Determine the indicators of the culture, and behaviours that you are striving for

How can we enhance collaboration within and beyond schools for meaningful change?

# What magic is required?

- Start small
- Focus on relationship
- Partnership rather than patriarchy

“Build it and they will come”
